CSAG Feline Screen Portal: Initial Use for Cat Owners

The new CSAG feline screening scheme is now operating, and the dedicated website is open.

- The new scheme aims to improve screening of cats for HCM in UK by standardising the way that all screeners measure from their scans and providing comprehensive guidance to the cardiologist and owner on how to interpret the results and make breeding decisions.
- The website is easy to use and highly secure. As an owner you will easily be able to see all your screen results associated with each cat.
- Once the online screen form is completed by the cardiologist, HCM negative, normal results are automatically entered into the HCM Negative Register held on the site. The register is clear and easily found.

Please register as an owner on the site.

csagcatscreening.org.uk

Once you have registered your details, you will have an account and can enter your cats' details under 'My Cats'.

Appointments section in your account.

This shows your list of any appointment dates that you have entered for each cat after arranging them directly with a screener.

Manage appointments section in your account

This section allows you to select each of your cats, choose the appropriate screener from the drop-down list and enter the date that you have arranged a screen for.
This must be done at home before your screening appointment for each cat.

- **You must select which screener you are using from the dropdown box in the 'manage appointments' section, otherwise the screener will not be able to create the screen form for that cat.**
    - A full list of screeners can be found on the homepage of the VCS website. The list shows which screeners perform cat screens.
    - **https://www.vet-cardio.co.uk/find-a-cardiologist/**
    - If the screener is not on the dropdown list, please contact the administrators **catscreenportal@vet-cardio.co.uk** OR if you have not used that screener on the screen portal before, please check with the screener that they have opened their account on the site.

- If this screen date that you entered is not correct on the day of the screen, it doesn't matter. The screener will enter the correct date.

How to add a normal screen result to the HCM negative register when it was performed using a paper certificate.

- Register the cat in your account.
- The cat must have been over 2 years old at the time of the screen.
- The screen must have been performed no earlier than Feb 2026
- Email a copy of the screen result to catscreenportal@vet-cardio.co.uk
